

Frequently Asked Questions:

Do you give out un-retouched headshots/can I download a copy of my proof gallery?

No. The editing portion of my work is an integral part of the personal style that you see in my headshot portfolio. I want to make sure that your headshots look like the rest of my work and reflect why you chose me! If you'd like a full gallery of images to keep from your session that are not retouched (great for bloggers, influencers, or for those trying to build a personal brand), please inquire about booking a portrait session instead!

Can I add extra outfits/locations to my session?

Yes! Any wardrobe changes/additional locations outside of the scope of the package you choose can be added for \$10 per location or outfit. As long as it fits within the time constraints of your session, you can add as many additional outfits or locations as you'd like.

Can I bring a friend/parent to my session to make me laugh/keep me company?

Absolutely! The more the merrier!

Frequently Asked Questions:

What if I want to wear my hair straight & curly/have photos with and without a beard?

You can either split your session up into 2 half sessions on different days, or you can take a few minutes out of your session time to change your style. If the change will take longer than 10 minutes, I recommend splitting your session so you can make the most of your time.

How long will you store my images?

I clean out my client files every 6 months and cannot guarantee that I will store the images for you, so be sure to download your images and create your own backups. I do not store the raw files from your session (aka your entire proof gallery) for more than 6 months, so if you'd like any additional photos retouched, please make any selections within that time frame.
